CARACTERÍSTICAS GERAIS

GENERAL FEATURES

VENDIDO EM
 KIT

FORNECIMENTO EM KIT

Os equipamentos Toscca (quando identificados) são fornecidos em KIT, devidamente acondicionados e com todos os componentes necessários à sua montagem. O KIT é acompanhado do respectivo manual de instruções de montagem de modo a facilitar a tarefa.

DIY KIT

Toscca equipments (when identified) are supplied in KIT, properly packed and with all the components necessary for its assembly. The KIT is accompanied by its assembly instruction manual to keep it easy.

MONTAGEM TOSCCA

A Toscca dispõe de equipas de profissionais de montagem, garantindo naturalmente a qualidade do serviço prestado.

ASSEMBLY BY TOSCCA

Toscca has teams of assembly professionals, naturally guaranteeing the quality of the service provided.

MADEIRA

A Toscca utiliza principalmente madeira proveniente do norte da Europa. Esta madeira caracteriza-se por ser de crescimento lento o que lhe confere uma grande estabilidade dimensional e resistência mecânica. Estas características fazem dela matéria-prima preferencial para os nossos produtos e equipamentos. A Toscca privilegia a aquisição das madeiras provenientes de florestas com gestão controlada e com certificação FSC.

WOOD

Toscca mainly uses wood from northern Europe. This wood is characterized by being of slow growth which gives it a great dimensional stability and mechanical resistance. These characteristics make it the preferred raw material for our products and equipment. Toscca favors the acquisition of timber from managed forests with FSC certification.

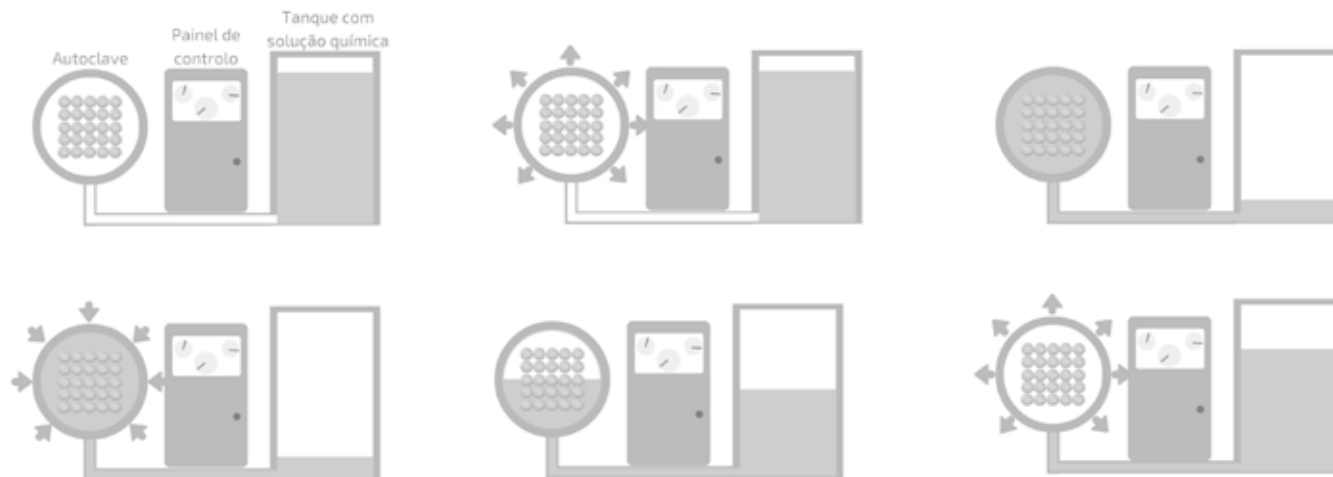

AS FENDAS

A madeira é um produto natural com capacidade para absorver e libertar humidade, mantendo o equilíbrio com a humidade circundante. Em períodos de tempo muito seco e temperaturas elevadas, poderão surgir fendas. Do ponto de vista funcional o aparecimento de fendas é inofensivo, e não são motivos para preocupação uma vez que as repercussões são unicamente estéticas.

CRACKS

Wood is a natural product with the ability to absorb and release moisture while maintaining balance with the surrounding moisture. In very dry weather and high temperatures, cracks may occur. From the functional point of view the appearance of slits is harmless, and are not cause for concern since the repercussions are solely aesthetic.

TRATAMENTO AUTOCLAVE
AUTOCLAVE TREATMENT

TRATAMENTOS

TREATMENTS

AUTOCLAVE VÁCUO E PRESSÃO

Tratamento em que a injeção de agentes preservadores é feita em profundidade até ao cerne por um processo físico que combina a utilização de vácuo e pressão. Adequada para madeiras na Classe R3 e R4, fazendo variar apenas da quantidade de químico aplicado.

A madeira tratada por este processo tem uma coloração “esverdeada”.

AUTOCLAVE VACUUM AND PRESSURE

Treatment in which the injection of preserving agents is done in depth to the core by a physical process that combines the use of vacuum and pressure.

Suitable for wood in Class R3 and R4, varying only the amount of chemical applied.

The wood treated by this process has a “greenish”.

TRATAMENTO TÉRMICO THERMOWOOD

Tratamento por ação do calor, realizado com elevadas temperaturas, entre 180º e 200º. Este processo transforma as hemiceluloses fazendo com que a madeira “perca” a apetência pela absorção de humidade no que resulta num aumento substancial da estabilidade dimensional da madeira.

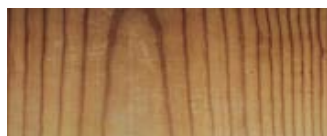

Adequado para a classe R2 e R3. consulte as páginas seguintes.

HEAT TREATMENT THERMOWOOD

Heat treatment, carried out at high temperatures, between 180º and 200º.

This process transforms the hemicelluloses causing the wood to “lose” the appetite by absorbing moisture which results in a substantial increase in the dimensional stability of the wood.

Suitable for class R2 and R3. following pages.

TRATAMENTO COM VELATURAS

Válido para a classe de risco R1, R2 e R3, normalmente executado com produtos de base aquosa: resinas acrílicas dispersas em água.

Garante a proteção da madeira para o exterior sem contacto com o solo ou fonte de humidade prolongada.

WOOD STAINS

Valid for risk class R1, R2 and R3, normally performed with aqueous based products: acrylic resins dispersed in water.

It guarantees the protection of the wood to the outside without contact with the soil or prolonged humidity source.

ENVIE-NOS A SUA FOTO

A fotografia da sua Cabana ou Abrigo é verdadeiramente única? Concebida por si e com o seu estilo impresso? Para a Toscca isso são verdadeiros ícones. Partilhe connosco fotos da sua Toscca através do e-mail comercial@toscca.com. Se a sua foto for seleccionada para futuros catálogos receberá um vale de compras Toscca no valor de 500€. Consulte o regulamento em www.toscca.com/regulamento.

SEND US A PHOTO

Is the picture of your hut truly unique? Designed by you and with your style? For Toscca, these are real icons. Share with us your Toscca photos through comercial@toscca.com. If your photo is selected for future catalogs you will receive a Toscca voucher worth € 500. See regulation at www.toscca.com/regulamento.

MANUTENÇÃO

MAINTENANCE

MANUTENÇÃO

Depois de bem definida a classe de risco em que a madeira vai funcionar e o tipo de tratamento a aplicar é muito importante fazer tratamentos regulares de manutenção de todos os equipamentos ou madeiras no exterior.

Com o serviço WOODCARE prestamos um:

- Serviço de aconselhamento sobre qual o melhor processo tendo em conta o seu custo e eficácia;
- Vendemos os produtos para cada classe de risco
- Como também fazemos a aplicação dos mesmos, sempre com a garantia de resultados ao mais baixo custo.

APLICAÇÃO DA VELATURA

1º Limpeza das paredes (lavagem ou passagem de uma pano húmido);

2º Aplicação de 1º demão depois das paredes estarem secas e previamente preparadas;

3º Aplicação da 2ª demão passado cerca de 8 horas;

4º Aplicação de um produto de acabamento exterior para melhorar o aspeto.

A aplicação das velaturas pode ser feita através de pincelagem ou pistola.

MAINTENANCE

Once well defined the class of risk in which the wood will work and the type of treatment to be applied is very important to do regular treatments of maintenance of all equipment or woods abroad.

With the WOODCARE service we provide:

- Counseling service on the best process taking into account its cost and effectiveness;
- We sell the products for each risk class
- As we also apply them, always with the guarantee of results at the lowest cost.

APPLICATION OF THE BILLET

1st Cleaning the walls (washing or passing a damp cloth);

2nd Application of 1st coat after the walls are dry and previously prepared;

3rd Application of the 2nd coat last about 8 hours;

4th Application of an exterior finishing product to improve the appearance.

The application of the nails can be done by means of a brush or a pistol.

VELATURAS
DISPONÍVEIS EM
EMBALAGENS DE
1,5 E 15 LITROS.

STAINS
AVAILABLE
IN 1,5 AND 15
